

# OLIVER AGRO

FRUIT TREE NURSERY EQUIPMENT

# EXPERIENCE **AND** PROFESSIONALISM AT YOUR SERVICE

**Oliver Agro** has **25 years of experience** in the fruit tree nursery sector, becoming the world leader in the production of professional and large-scale production machines. With the experience gained, Oliver Agro offers a series of machines that satisfy different stages of plant growth: from **soil preparation, bed forming, trimming, transplanting, treatments, weeding, harvesting or digging of plants.**

# *Bed former mod. BXC*

The **Bedformer Mod. BXC** is an indispensable machine for the creation of the **motherplant's bed**. Its main functions : **progressive accumulation of soil** leading to the **creation of ridge** for the motherplant, **cleaning of backsides of bed** and its **earthing up**.

Reversing the plowshares' direction, the **bed former** works as a remover, to facilitate the cutting of the rootstocks with the TXC uprooting machine.

# *Harvesting machine SP2000*

**The Harvester machine SP2000 is a machine conceived for: harvesting and digging out of rootstocks, vine cuttings; cleaning their roots from soil; sorting and storage of nursery plants**  
Production from: **100,000 to 300,000** up, with a daily production of around **15.000** cernite plants.  
Work on root systems up to **30 cm**.

# Harvesting machine SP2000 TXC

The **SP 2000 TXC** is a harvesting machine designed for: the cutting of the **wild rootstocks** from **motherplant**;  
harvesting of **wild grafts** from **motherplant** and storage of wild grafts on a rear platform  
**Compatible with all soils suitable for growing stumps/motherplants**  
Production from: **4,000 to 5,000** plants per day or 6600 linear meters/day

# Harvesting machine SP96

The **SP96 Harvesting Machine** is a machine designed for : **excavation, collection, sorting, storage of nursery plants**, on any type of soil, particularly **hard / heavy / clayey**.

For nursery **from: 300,000 fruit trees, ornamental and rooted cuttings**, with a daily yield of over **20,000 plants harvested and sorted**.

Work on root systems from **30 to 50 cm** and above and.

# *Transplanting machine mod. SD*

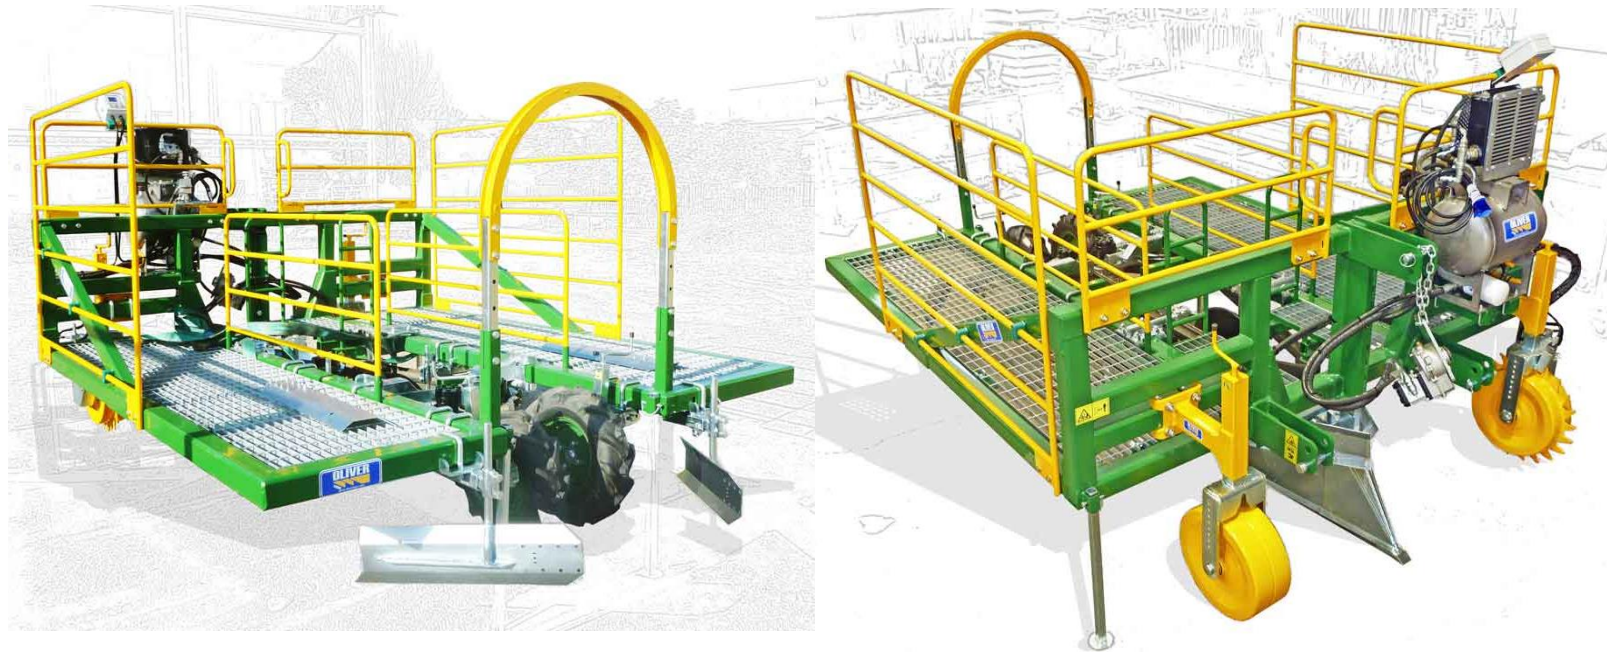

The **SD Superdrive Transplanter** is a machine designed for transplanting: **roostock, vineyards, vitro cultures, plants in pots, lavender**

Trailed type, performs a **constant and precise arrangement of the plants**, regardless of the speed of the tractor, thanks to an autonomous system of movements, synchronized.

Only one **operator** per row places up to **1500-1800 plants per hour**, with utmost ease and accuracy.

# *Transplanting machine SD for high plants*

The **high plant SUPER DRIVE Transplanter** is a machine created for planting plants from **1 to 4 cm of section** and from **20 cm to 2.0 meters tall**.

Trailed by the tractor, it performs a **constant and precise arrangement of the plants**, regardless of the speed of the tractor, thanks to an autonomous system of movements, synchronized.

Suitable for plants from **nurseries, fruit trees, sleeping eyes, lavender, Jatropha, flowers, cuttings** with or without roots and with peat cubes.

# *Pony 2000 Tool - Carrier*

**Self-propelled Tool Carrier Mod. 2000 PONY, with hydrostatic drive with variable rear track, multi-purpose and multifunctional.**

**Fully customizable, it works on inter rows of fruit and vineyard nurseries. Its lifter can mount different equipment that perform a variety of operations.**

# Soilbagger machine

The Soilbagger machine is perfect for the **nylon soil bags for nurseries packaging** for large productions. Suitable for **bagging soil, compost, humus, peat and various substrates.**

Equipped with wheels, it can be parked anywhere.

Bag sizes: **Ø mm 100 x 400 capacity 6 kg - Ø mm 150 x 400 capacity 9 kg**

# Fastbag

**Fastbag** is a soil filling machine designed to fill jute bags or big heavy bags of gravel material such as: stones, sand or other materials.

Its simple use makes it a versatile machine, suitable to operate in the most adverse environments, thanks to a light and easily transportable structure.

The machine works at full capacity with **No. 4 operators.**
